

# AIR MASK IONIC AIR PURIFIER AM01

1. LANYARD
2. IONS RELEASE BRUSH
3. LED
4. ON/OFF KEY
5. USB CHARGE SOCKET

### PACKAGE CONTAIN

- AM01 X 1
- LANYARD X 1
- USB CHARGE CABLE X 1
- USER'S MANUAL X 1

### MAIN FEATURES

- Produce 20 million Air IONs per second per cm<sup>3</sup>
- Subside Airborne Pollutants include:
  - ▶ Particulate Matter PM2.5
  - ▶ Pollen
  - ▶ Smoke
  - ▶ Other Allergens
- The tailor-made Lanyard will enhance the ionizing performance.

- One Key Startup
- LED shows the unit in work
- Long Operation Time up to 18 hours
- Eco-Friendly Battery (Non-Lithium Battery)
- Overheat Protection (Working / Charging)

### IMPORTANT NOTES

- Read this manual before use the product.
- The lanyard provided is tailor-made to enhance the ionizing performance. Replace with other lanyard may degrade the performance.

### SAFETY NOTES

- Avoid using this product on baby or person in need of care.
- Person with Heart Disease or using Artificial Pacemaker **MUST NOT** use this product
- **MUST NOT** use the product in the environment with flammable gas, combustible gas & volatile liquid, e.g. petrol station & LPG filling station.
- Do not use the unit on bed, cover by quilt or blanket.
- If you are allergy with the lanyard, please stop using this product.

**CAUTION: THIS DEVICE CONTAINS BATTERIES. KEEP IT AWAY FROM FIRE OR HEAT.**

### LANYARD

- Please tie up the lanyard with the unit.

### POWER ON/OFF

- To power ON the unit, press the **ON/OFF** Key once and Blue LED turn on. The unit will start to produce IONs.
- To power OFF the unit, press & hold the **ON/OFF** key and the Blue LED turn off.

### BATTERY LOW

- When the battery power too low, the unit will be auto off, please re-charge the unit asap.

### CHARGING

- Plug the Micro USB cable into the unit charge socket at the bottom.
- Plug the USB cable into a USB 5V1A adaptor (Not Included).
- During charging, the **RED LED** will turn on.
- Charge the unit for 6~8 hours and unplug the cable before use.
- As the Lanyard is conductive, please put it away from the adaptor during charging.
- You can keep the unit in use during charging.

### SAFETY NOTES ON BATTERY

- The unit is using Non-Lithium battery that is safe from burn out.
- The unit is well designed for continuous charging from 8-10 hours and protected from overheat during operation or charging. As such, there is no indication on battery fully charged.
- Please charge the unit for at least 6 hours and unplug the charge cable after 8-10 hours charging.
- To extend the battery life, please charge the unit once a week for 6 hours or above.

### SPECIFICATIONS

Voltage	: DC 3.6V
IONs produced	: > 20 million /sec/cm <sup>3</sup>
Operating Temperature	: 0°C to +45°C
Size W.H.D.	: 23 x 65 x 19mm
Product Weight	: 27.5 g

### REMARKS

*The IONs count and battery life figures mentioned are based on in-house measurement. The product performance may be varied.*
